Software Overview

Whether you need creative, specialized, and long-lasting Nidhi software, Renu SB Creation provides all the cutting-edge software options that will support your company's operations across a variety of locations, gadgets, browsers, and operating systems. We provide a complete RD, FD, MIS Loan & Financial Management Nidhi Software Solution for Your Nidhi Company Business. Our software is easy to use and beneficial for any firm engaged in Nidhi-related activities. Our software is completely adaptable, giving the company all the tools necessary for efficient operations. As the operation of a Nidhi software business is complex, maintaining the firm without any artificial aid is usually a challenging effort and may even entail risks of errors. The software helps manage the shares, fixed deposit (FD), recurring deposit (DDS), loan, etc.

Our Benefits

For Nidhi businesses, Nidhi software offers an integrated accounting software solution. It automates all of a Nidhi's fundamental tasks, including member registration, deposit and withdrawal processing, loan administration, and accounting. The Core Banking Nidhi software is regularly updated with the most recent sophisticated security updates. It is built on the most recent technological stack. It is adaptable cloud-based software that can be utilized by both small and large enterprises.

Features in Details

Member/Customer Management - The software enables efficient management of member profiles, including personal details, contact information, and membership status. It allows for easy member enrollment, modification, and deactivation.

Share certificate Management - A share certificate is a legal document issued by a company to its shareholders, providing evidence of their ownership of shares in the company. In the context of Nidhi software, which is typically used by Nidhi companies (non-banking financial institutions), the management of share certificates involves the generation, issuance, and maintenance of these certificates for shareholders.

Deposit Accounts (FD/RD) - Service offered by Nidhi Banking Software is Fixed Deposits (FD). FDs are a type of savings account where a member can deposit a lump sum amount for a fixed period of time and earn interest on it. Recurring Deposits (RD) are also offered by Nidhi Banking Software. RDs are similar to FDs, but instead of a lump sum amount, members deposit a fixed amount of money every month for a fixed period of time. At the end of the period, the member receives the total amount deposited along with the interest earned.

Loan Management: Nidhi banking software provides comprehensive loan management functionality. It allows members to apply for loans, enables loan processing, tracks loan disbursements, and manages repayment schedules. The software may also support interest calculation, penalty calculation, and automated reminders for overdue payments.

Account Statement Generation: The software generates account statements for members, which include details of deposits, withdrawals, interest earned, and outstanding loans. These statements help members keep track of their financial activities.

Transaction Processing: The software provides the ability to process various types of transactions, including deposits, withdrawals, fund transfers, loan disbursements, and repayments. It ensures accurate and secure transaction processing, maintaining transaction history for auditing purposes.

Document Management: The software allows for the storage and retrieval of member-related documents, such as ID proofs, address proofs, and loan agreements. It ensures easy access to essential documents whenever required.

Reporting and Analytics: Nidhi banking software provides a range of reports and analytics to help management track the performance of the company. It may include reports on deposit trends, loan portfolio, financial statements, member growth, and more.

Security and Data Protection: Nidhi banking software prioritizes data security and privacy. It incorporates user authentication, access control, data encryption, and regular data backups to safeguard sensitive information.

Admin Dashboard

The Nidhi Software Admin Dashboard is a web-based application interface specifically designed for the administration and management of Nidhi Software. Nidhi Software is a specialized software system used by Nidhi companies or mutual benefit societies in India. These companies operate on the principles of mutual benefit and are involved in lending and borrowing activities among their members. The Admin Dashboard provides various features and functionalities to efficiently manage the operations of a Nidhi company.
